Cooperative Extension Work In Agriculture And Home Economics

U. S. Department of Agriculture
and State Agricultural Colleges
Cooperating

Extension Service, Office of
Cooperative Extension Work.
Washington, D. C.

Announcement

Lantern Slide Series on Motion Picture Film

Beginning May 1, 1936, the Office of Cooperative Extension Work will be prepared to lend lantern-slide series on film strips on the 20 agricultural and home-economics subjects listed below to State extension directors for use in their respective States, supplementing the present loan service in standard glass lantern slides.

Each slide series in film form is accompanied by descriptive titles, supplemented by either mimeographed or printed material in the form of explanatory notes, bulletins, circulars, or syllabi intended to prove helpful in the presentation of the subject illustrated.

Application for the loan of slide series in film strip should be made by or through the State directors of extension to the Office of Cooperative Extension Work, Extension Service, United States Department of Agriculture, Washington, D. C.

The borrower will be held responsible for any damage or loss to film strips while in use or during return shipment.

Film strips may be kept for a period of three months from date of shipment if a definite plan of use is provided for by the State extension service borrowing the strips. Any extension of this period must be by special arrangement in advance.

In cases where film strips are requested by a State director of extension for the exclusive use of an individual county agricultural, home demonstration, or club agent, or other extension worker not located at the State agricultural college, the loan period will ordinarily be limited to one month and film strips will be sent, if desired, direct to the individual for whose use the strips are requested.

If it is desired to purchase copies of slide series on film strips, orders for same may be placed with the Office of Cooperative Extension Work.

At the expiration of the time allowed, the film slides must be returned promptly by first-class mail to the Office of Cooperative Extension Work, Extension Service, United States Department of Agriculture, Washington, D. C.
